Welcome Friends This is Kamlesh

Today I'm explain how to create web application using

1. Servlet Technology
2. JSP Technology

First off all some discussion and talk about to below:-

We know that what is java language and how to Run HelloWorld program 😊

After core java programming we need to learn Advance JAVA (J2EE) we also known.

But here I'm ask you some questions to you:

1. Why Learn JAVA
2. Why Learn Core JAVA
3. Why Learn Advance JAVA
4. How to Build JAVA Software
5. Which to learn Core JAVA/Advance JAVA
6. How many Technology used with java
7. How many language used with java

You Know guys following language used with JAVA

1. HTML
2. CSS
3. JS
4. Bootstrap
5. JQuery
6. SQL
7. More other thing

I don't know how many technologies used with java but

Theas language and technology, I'm used

I hope to you know that this technology . if don't know

No problem guys

I am come to the point, these are think after about…..
